

OK
DIA 5 What is the importance to the Soviets of imported Western technology, and how successful are they in acquiring and using it? Particular importance attaches to technology having possible economic or military utility.

NO
CIA 6 Change: What goals have the Soviets set for themselves in the area of strategic weaponry, especially vis-a-vis US, i.e., catching up on attaining a degree of superiority. Elimination of the overly general nature of the present wording and acceptance of the more limited statement would focus this KIQ on the essential problem.

OK
CIA New Include after KIQ 8 What are Soviet plans and progress toward the use of manned space systems to support and/or control strategic weapons. (p.4) Importance of subject.

NO
CIA New What will be the impact of the SS-X-20 on the overall Soviet strategic force structure? What are the problems Importance of subject.

NO
25X1D3a

~~X~~
DIA New KIQ What are Soviet intentions, plans and doctrine for the use of conventional forces in achieving strategic objectives?

NIO on KIQ #5.

The subject is Western technology acquisitions, and we amplify with "particular importance attaches to technology having possible strategic utility." DIA wants to replace "strategic" with "economic and military." That covers just about everything, so we have not particularized.

Reject.

NIO on KIQ 6:

The wording should remain as is since it was developed in response to a request/comment by Dr. Kissinger.

Reject.

NIO on new CIA space KIQ:

Believe this could be included in the KSR on present space KIQ #8.

Reject.

NIO on new CIA SS-X-20 & SS-X-16 KIQ:

Approved For Release 2000/08/30 : CIA-RDP80B01500R000200230012-5

Reject--covered by monitoring KIQ and KIQ 12.

NIO on new DIA KIQ on conventional forces for strategic objectives.

Reject.

CIA 14 Change:
What are Soviet intentions and progress toward the development of long range cruise missile systems against land based targets? What are their technological capabilities to develop strategic cruise missile systems? How long would it take to develop this missile if they decided to develop one?

The rewording provides the balance between intentions and capabilities without placing undue emphasis on progress of a system on which "development" has not begun.

DIA New Soviet Strategic Airlift

What programs and plans do the Soviets have for future strategic airlift capabilities?

Include the replacement or modification of aircraft, with particular emphasis on jet transports.

SOVIET NAVAL SYSTEMS

NSC St. 17. What programs and plans do the Soviets have for the development and deployment of SLBM systems, including modifications to existing systems?

Include any changes made in SSBN operational practices and patrol areas, and command and control capabilities. Also include any plans for development and deployment of SLBMs to be used in a depressed trajectory mode.

NSC St. 19. What progress are the Soviets making toward acquisition of an effective capability for trailing submarines, and for detecting and localizing them in the open ocean?

Consider non-acoustic as well as acoustic means for detection and localization.

NIO on CIA change to KIQ 14:

Reject - will be covered in KSR.

NIO on new DIA KIQ on Sov. Strategic Airlifts:

Soviet aircraft production well known. Proposed KIQ subsumed in KIQs 27, 28, 29.

Reject.

NIO on NSC St. add on to KIQ 17:

Reject - will be covered in KSR.

NIO on NSC St. add on to KIQ 19:

Reject - will be covered in KSR.
